

Engineer's Remote Support by SCanView

Access to live data

Optimising plant operation

Plug & Play on SCANVIEW BMS

Harnessing the latest Internet of Things (IoT) technology, SCanViewERS provides our qualified combustion engineers the capability to remotely view live data from your combustion plant, enabling remote fault diagnostics & troubleshooting. Contact us on webenquiry@saacke.co.uk.

SCanViewERS

Features & Benefits

- “Plug & play” on existing SCanView BMS installations
- Mobile network connection eliminates the need to patch into the site network
- Provides SAACKE engineers read-only remote access to valuable metrics, fault logs, parameters, and drive setpoints from anywhere in the world
- Facilitates off-site fault diagnostics, allowing our team to be fully equipped before attending site

SCANVIEW ERS includes:

- 4G router & associated hardware
- SIM card
- 8-hours annual remote support allowance
- Installation and setup

Service Contract customers will receive a 25% discount on their annual SCanViewERS subscription.
